GeneFlow Celebrating 10 years

GeneFlow was founded in February 2002 with a mission of supplying high quality Molecular Biology equipment and consumables and providing an outstanding level of professional support to our UK customers in universities and research institutions.

Our company has steadily grown over the past 10 years and is now an established business in the Molecular Biology research field. This growth has been achieved with the support of our excellent staff and the world-wide manufacturers we work so closely with

Sadly Mr Paul Fisher, one of the Shareholders passed away in 2009. Paul was instrumental in setting up GeneFlow and he is greatly missed by all who knew and worked with him.

We do of course realise that none of our achievements could have been possible without our loyal customers, many of whom we have known for a number of years and are extremely loyal to us.

The Directors at GeneFlow would like to say a great big THANK YOU to everyone who has supported our business and we look forward to working together in the future.

Jean Emly and Lynda Fisher

April 2012
