

TransIT[®]-Express Transfection Reagent

A broad spectrum, low toxicity DNA transfection reagent optimized for 96-well plate applications

- **Simplified 96-Well Plate Format**—Designed specifically for high-throughput applications.
- **Low Cellular Toxicity**—Maintain cell density and reduce experimental biases.
- **High Efficiency Delivery**—Achieve expression in a large population of cells for experimental success.
- **Broad Spectrum DNA Delivery**—Utilize one transfection reagent and protocol for a wide variety of cells.
