

# HIGH THROUGHPUT PLANT DNA ISOLATION KIT

## Product Features

- ✓ Isolate high quality and quantity DNA from a wide range of plant species
- ✓ Fast and easy processing using a magnetic bead system
- ✓ Robust Lysis System for the most challenging sample types
- ✓ Consistent, high yields of inhibitor-free DNA

## Magnetic Bead System — Automation

Plant DNA can either be isolated from fresh or frozen plant samples. Once the sample is homogenized in our robust lysis buffer, Magnetic Bead Suspensions are added to the sample and then placed on the magnetic separation rack.

Only the DNA will bind to the magnetic beads, while most of the proteins will be removed in the supernatant. The bound DNA is then washed in order to remove any remaining impurities, and the purified total DNA is eluted inhibitor-free.

## High Integrity DNA

# HIGH THROUGHPUT SALIVA DNA ISOLATION KIT

## Consistent Isolation of High Quality DNA

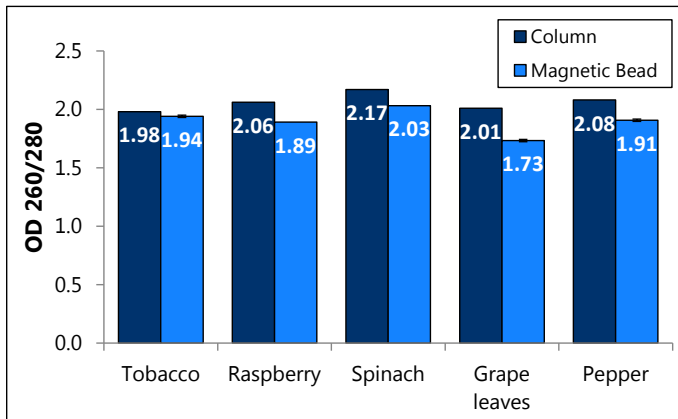

Figure 2. High DNA Quality.

## Inhibitor-Free DNA Confirmed by Real-Time PCR

Figure 3. High DNA quality was confirmed by Real-time PCR.

## The Most Robust Kit on the Market

Work with the plant species of your choice.  
Excellent prices and after sale technical support.

## Ordering Information

| Description                                    | Prep Size | Cat. Number |
|--|-----------|-------------|
| Plant DNA Isolation Kit (Magnetic Bead System) | 50 preps  | 58200       |
| Plant/Fungi DNA Isolation Kit                  | 50 preps  | 26200       |
| Plant RNA/DNA Purification Kit                 | 50 preps  | 24400       |

v3.0
